## Summary

As a Front-End Developer skilled in HTML, CSS, JavaScript, React, and Vue.js, I specialize in creating engaging, user-friendly web applications with a strong focus on innovative design and storytelling. While my primary expertise is in frontend development, my experience with backend technologies provides me with a comprehensive understanding of full-stack development. Dedicated to continuous learning, I thrive in dynamic environments, transforming ideas into user-centric, functional, and aesthetically appealing applications.

## Skills

**Front-end:** HTML, CSS, Bootstrap, JavaScript, React.js, VueJS, Firebase.

**Additional Skills:** Node.js, Express, Firebase Authentication, Firestore, RESTful APIs.

**Version Control:** Git, GitHub.

**Design:** Responsive Design, Interactive Design, UI/UX Understanding, Figma.

**Principles & Methodologies:** Agile Methodologies, Scrum Principles, Product Development.

## Work Experience

### Homebody - E-commerce Web App Remote

July 2024 - Present

#### Freelance Front-end Developer

- Developing a responsive, retro-themed e-commerce website for a t-shirt business.
- Designing and implementing a visually engaging landing page.
- Creating product pages for apparel and accessories to enhance navigation.
- Integrating a blog section using Netlify CMS for content management.
- Setting up Shopify for e-commerce functionality, including custom front-end development.
- Preparing for final testing and optimization to ensure a launch-ready website.

Vite Node.js React.js React Router Shopify Backend Netlify (Decap) CMS Mailchimp

### Offbeat Security Remote

April 2024 - Present

#### Freelance Front-end Developer

- Leading front-end development for a blockchain security web application.
- Developed dynamic, responsive interfaces using React Router, which reduced page load times by 20% and provided a smoother user experience through client-side navigation.
- Customized Netlify (Decap) CMS for content management.
- Adding a blog subscription feature for user engagement.
- Managing the project lifecycle from concept to deployment.

Vite Node.js React.js React Router React Awesome Reveal React-Slick React Accessible Accordion React Markdown Netlify (Decap) CMS Mailchimp Substack

**Achievements:** Delivered a dynamic web application tailored to blockchain security needs. Enhanced user engagement through custom features and efficient content management. Successfully launched the application within the projected timeline

### Beko Corporate Full-time

2021 - 2023

#### Research and Development Engineer

- Utilized agile methodologies for sustainable product development.
- Researched and adopted new technologies, analyzed market trends, and developed technology roadmaps.
- Prepared academic writings, patent applications, and technical reports.
- Collaborated with partners to ensure projects met industry standards and sustainability goals.
