Summary

Front-End Developer skilled in HTML, CSS, JavaScript, and React. I create engaging, user-friendly web applications, focusing on storytelling and innovative design. Dedicated to continuous learning, I thrive in dynamic environments, transforming ideas into user-centric, functional, and aesthetically appealing applications.

Skills

Front-end: HTML, CSS, Bootstrap, JavaScript, React, Firebase,

Version Control: Git, GitHub,

Design: Responsive Design, Interactive Design, UI/UX Understanding, Figma,

Principles & Methodologies: Agile Methodologies, Scrum Principles, Product Development,

Work Experience

Homebody - E-commerce Web App `Remote`   July 2024 - Present

Freelance Front-end Developer

- Developing a responsive, retro-themed e-commerce website for a t-shirt business.

- Designing and implementing a visually engaging landing page.

- Creating product pages for apparel and accessories to enhance navigation.

- Integrating a blog section using Netlify CMS for content management.

- Setting up Shopify for e-commerce functionality, including custom front-end development.

- Preparing for final testing and optimization to ensure a launch-ready website.

Offbeat Security `Remote`   April 2024 - Present

Freelance Front-end Developer

- Leading front-end development for a blockchain security web application.

- Developed dynamic, responsive interfaces using React Router, which reduced page load times by 20% and provided a smoother user experience through client-side navigation.

- Customized Netlify (Decap) CMS for content management.

- Adding a blog subscription feature for user engagement.

- Managing the project lifecycle from concept to deployment.

Achievements: Delivered a dynamic web application tailored to blockchain security needs. Enhanced user engagement through custom features and efficient content management. Successfully launched the application within the projected timeline

Beko Corporate `Full-time`   2021 - 2023

Research and Development Engineer

- Utilized agile methodologies for sustainable product development.

- Researched and adopted new technologies, analyzed market trends, and developed technology roadmaps.

- Prepared academic writings, patent applications, and technical reports.

- Collaborated with partners to ensure projects met industry standards and sustainability goals.

Education

Anadolu University   2023 - 2026

Bachelor's Degree in Management Information Systems
